

ALL TERRAIN OT ENDPOINT SECURITY

Able to recognize and preserve thousands of critical OT applications

TXOne Stellar Series offers a comprehensive OT solution for persistent security coverage, aiming to fulfill different industry requirements varying from electric power, oil and gas, manufacturing, pharmaceutical, semiconductor and retail cybersecurity. Throughout the asset life cycle, Stellar Series is dedicated to boosting the reliability and efficiency in the OT environment for great operational stability.

Stellar Series consists of StellarProtect the unified agent and StellarOne the centralized management console. StellarProtect secures modernized assets by consolidating process monitoring and behavioral anomaly detection with a library of ICS application and certificate inventory. For fixed-use and legacy systems, StellarProtect locks them down so they can only perform tasks related to their specific roles. Moreover, StellarOne empowers security administrators smooth management and instant response from a single pane of glass.

KEY PRODUCT CAPABILITIES

OT-NATIVE COMPLETE PROTECTION

- **Industrial-Grade Next-Generation Antivirus**
OT/ICS root of trust and advanced threat scan secure the OT/ICS assets with no interruption to operations
- **Operations Behavior Anomaly Detection**
Auto-learn the runtime behavior for being adaptive to dynamic and autonomous operations, and efficiently detect abnormal operations with least privilege control to prevent malware-free attacks
- **Operation Lockdown**
Lock down the operational integrity, reducing the chance of downtime and cost of resilience especially for the unpatchable systems
- **Trusted USB Device Control**
Provide protection against unauthorized access of USB devices
- A single lightweight agent specifically optimizes for the OT/ICS environment to ensure high performance and minimal impact to the operations

INDUSTRIAL APPLICATION AND CERTIFICATE REPOSITORY

- Industry's only database with OT context focus that can identify thousands of applications adopted in various OT environments to ensure undisturbed operations
- **OT Application Safeguard**
Intelligently locate and secure the operational integrity of the critical OT applications by preventing the un-authorized changes

ASSET LIFETIME SECURITY

- Offer the long-term support while the modern assets become legacy
- Compatible with legacy platforms and preserves critical systems with OT Zero Trust technology

KEY BENEFITS

ALL-IN-1 SINGLE AGENT

One unified lightweight agent simplifies security by combining industrial-grade next-generation antivirus, operation lockdown, and OT anomaly detection

OT CONTEXT FOCUS

Industrial application repository builds the operational baseline, detects operational anomalies, and enforces operational integrity

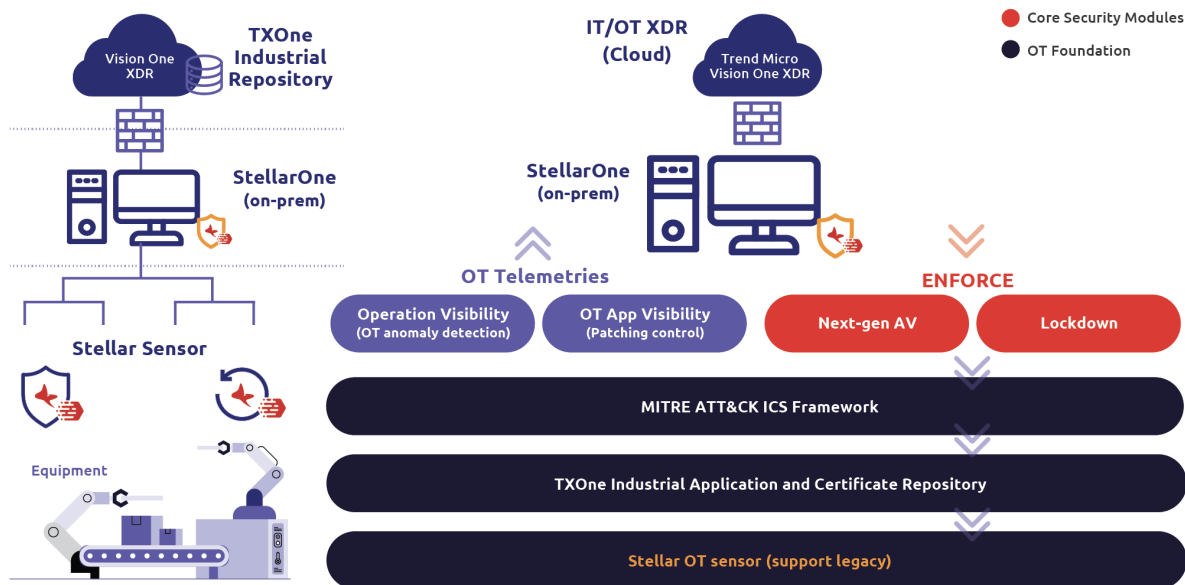

LONG-TERM PROTECTION ON LEGACY SYSTEMS

All-terrain OT endpoint security ensures lifetime protection along the entire life cycle of asset systems

TXONE STELLAR SECURITY TECHNOLOGY STACK

All-in-1 for Operation Visibility > Detect Anomaly > Enforce Integrity

LICENSE EDITIONS

Bundled features	Kiosk	ICS
Targeted users	Lite edition for Banking, Retail	Complete edition for Critical Infra, Manufacturing, Pharma
Industrial application repository		✓
OT application safeguard		✓
Intelligent runtime learning		✓
Next-generation antivirus	✓	✓
Operations lockdown	XP/2000 only	✓
Operations behavior anomaly detection	✓	✓
Trusted USB device control	✓	✓
Support legacy systems	✓	✓

SUPPORTED OPERATING SYSTEM

TXOne StellarProtect Agent

Windows Client | 2000 SP4 (32-bit), XP SP1 or later (32-bit), Vista (32-bit), 7, 8.x, 10, 11

Windows Server | 2000 SP4 (32-bit), 2003 SP1/SP2/R2 No-SP/SP2 (32-bit), 2008 SP1/SP2/R2 No-SP/SP1, 2012 No-SP/R2 No-SP, 2016, 2019, 2022
